AeHealth®
Do Ahead of the Illness!

CE ISO 13485

Lamuno X®

Fluorescence Immunoassay Analyzer

10 Channels Operation

Designed by "reddot" award winner team
"Red-Star" award winner team

AeHealth®
Do Ahead of the Illness!

Lamuno X®

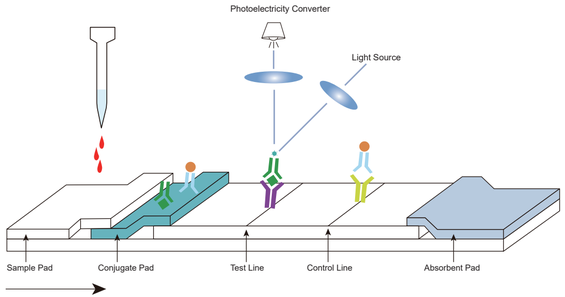
Principle

Lamuno X uses an LED as the excitation light source. The emitted light from the fluorescence dye is collected an converted into electrical signal. The signals are closely related to the amount of fluoresce in dye molecules present on the spot under examination. After a test sample is applied to the test cassette, the test cassette is inserted into Lamuno X and the concentration of the analyte is calculated by a pre-programmed calibration process.

Lamuno X can only accept test cassettes that are designed specifically for this equipment.

Lamuno X is equipped with a built-in test cassette Holder.

The test cassette holder will appear through the opening on the front surface of the equipment.



Testing Process

Turn on the power > Scan QR Code > Reagent cassette detection > Print the result

Easy to Use

- **7**-inch HD touch screen
- All in one Screen, Ease of Access

Multi-channel

- **10**-channel independent operation
- Support random selection of channels to detect different items

Cartridge Tray

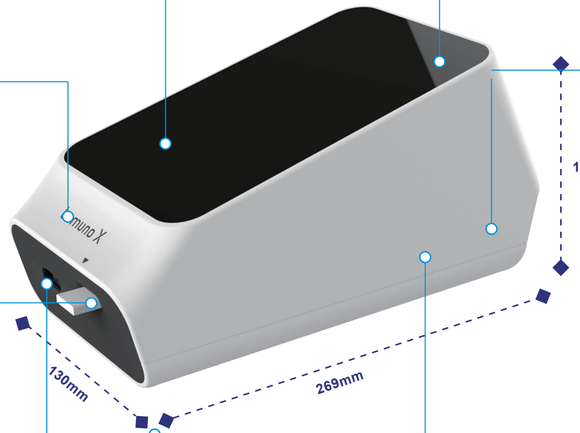
- More than **70** test items
- Barcode recognition test items
- Support Quick test and Timing test modes

Scan identification information

- Support wireless upgrade
- Scan barcode to load sample information
- Scan the QR code to load reagent calibration curve information

Specification

- Dimensions: 269*130*137mm
- Weight: 1.5Kg

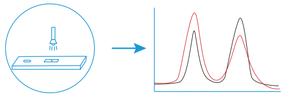


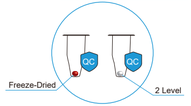
More Convenient Data Transfer

- Real-time auto-printing
- Support external printers to print reports
- Direct connection to LIS/HIS
- Supports USB Disk to upgrade software, export data, and save page screenshots
- Store **50,000** data

High Accuracy

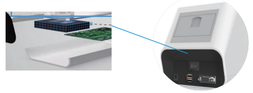
- Time-resolved fluorescence based on labeling of rare earth europium ions
- Quality controls specifically for the Lamuno series to monitor reagent stability
- Good correlation with CLIA method
- Quality control products were transported and stored at room temperature
- Third-party quality control recommendations (Contains target value)





Easy to carry

- Built-in battery: Without power supply, it can work continuously for **8** hours



Application scenarios

Outdoor Drug Testing Station | ED (Emergency Department) | Clinical Lab | ICU | Ambulance
